

0a. INTRO

Rise – The Vieneo Province is a focused logistics sandbox. While it shares some similarities with Elite Dangerous and EVE Online, it narrows the experience down to transport and economy.

There's no constant combat, no story progression, and no structured missions. Instead, you pilot vehicles, move cargo or passengers, and build reliable income through planning and consistency. Progress is gradual and driven by how well you understand routes, demand, and efficiency.

The game doesn't set goals for you—you're expected to create your own. If you approach it looking for direction or constant action, it may feel lacking. But if you enjoy systems, optimization, and steady improvement, it offers a calm and methodical experience.

"It is a peaceful life."

The interface can feel outdated and a bit dark at first, and it may take some time to navigate comfortably. However, once you get used to it, it becomes functional and easy to work with.

For controls, the game is best experienced with a gamepad, and even more so with a joystick and throttle (HOTAS), which greatly improves immersion and handling.

If you don't know if the game is worth or not for you, check the DEMO! It is the same game except for some end features which will not be a problem at all;

1. Demo players may not create an alliance.
2. Demo players may not customize their vehicles (trim color, hull registry, vanity plates).
3. Demo players are not allowed to buy plots of land (and therefore cannot construct colonies).
4. Demo players can not earn interest at the bank.
5. Demo players may not trade commodity futures.
6. Demo players may not accept (or eventually post) contracts on the portal.

These are hardcaps you get with the demo, but honestly, if you are going to do some of it you will be already hooked to the game and with enough in-game money already, so for new players and recurrent players the DEMO is perfect for trying and enjoying the game, think of it as EVE Online's Omega-Alpha system, but way softer.

0b. First steps

1. Do the initial tutorial, configure your gamepad and bindings (Or Joystick/HOTAS).
2. Once you get to the car, beware of curbs, they can kill you, navigate with GPS/Tracker for easy travels. (The initial car is very sensible to turns, don't crash and die with money in your pocket!)
3. Make some money!
 - a. Join an Alliance, they will lend you planes and maybe initial capital for your operations towards helping the Alliance and your pocket!
 - b. Rent a Plane, A-4, and rent some containers, from there check for trade opportunities and deliver the goods to!

1. MILESTONES

- A. **First Successful Simulation Flight:** Try using the E-11 in the UI Building (Simulator), do some trips, familiarise with future trips... It's free! Forget the T-19 Stratomaster!
- B. **Credits:**
 - **First 10k:** Drive around as taxi with your starter vehicle to gather credits
 - **First 100K:** Once you get enough credits you can start trading using a rented or leased vehicle, just be careful with your trips and investments!
 - **First Million:** Rinse and Repeat!
- C. **Vehicles:**
 - **First Truck:** ¿X/Y?
 - **First Plane:** A-4
 - **First V-TOL:** E-10 or E-11
- D. **Colonies:**
 - **TO BE DONE**

2. HOW TOs

A. *GUIDANCE, GPS and Waypoints*

B. *V-TOL Flight*

C. *MARKET and INTERACTIONS*

- With InterMedia you can interact with markets, where you can buy resources and fuel, take passengers too; all is **cargo**
- You can buy at low price and sell at higher prices somewhere else, for this you need a land or air vehicle with cargo capacity or with corresponding containers in the **Cargo Bay**.
- When using InterMedia for trading, in the instance of buying, you can manually choose where the cargo goes, if inside stowage, container X or Y, you can do this through the MFD screen. You select the bay and the amount, and input it: "2 5" or "3 10" means Container 2, 5 MT Units, and Container 3, 10 MT Units

3. BASICS AND INFO

- **When you die you lose all your cash and also your cargo** if inside a vehicle.
- Trades and services are **paid with cash**, you can **open a bank account** in the Bank Building with the InterMedia menu, which allows you to **receive funds and save funds** from disappearing when dying.
- **AVOID T-19 Stratomaster**, while a very or the prettiest plane, it flies very badly, is recommended to **use A-4 Instead**.
- You can upgrade your E-10 to E-11 for 1 or 2 M credits at CPOC.
- Ships, aircraft and vehicles don't have a static price, they can be bought at Rusty's or at auctions for lower prices.
- You can rent vehicles instead of buying them for relatively cheap prices, you can also rent Cargo Containers and similar objects or items.
- F1 Contains all the bindings for keyboard, in case you miss something
- Be careful with Cabin and Plane pressure, you might explode mid air!

4. TIPS AND TRICKS

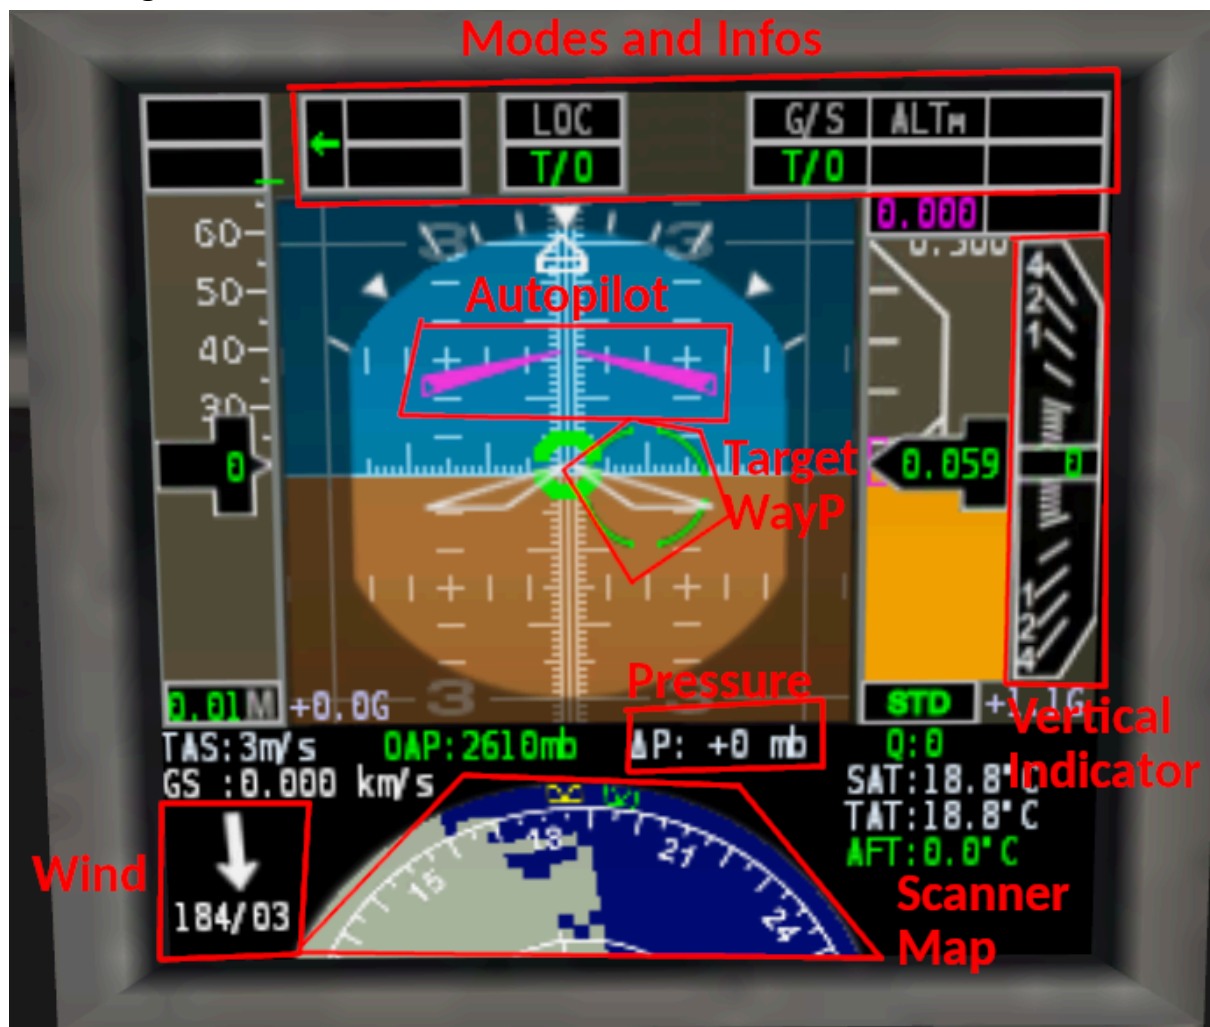

- When using VTOL, the **VTM** mode allows for an easy landing at the expense of fuel.
- When going away while flying, the **DOR** mode allows you to stay in perfect orbit while flying, not perfect, but less probability of crashing while away.
- XXXXXYYYYZZZZZ

5. HUDs (E-11)

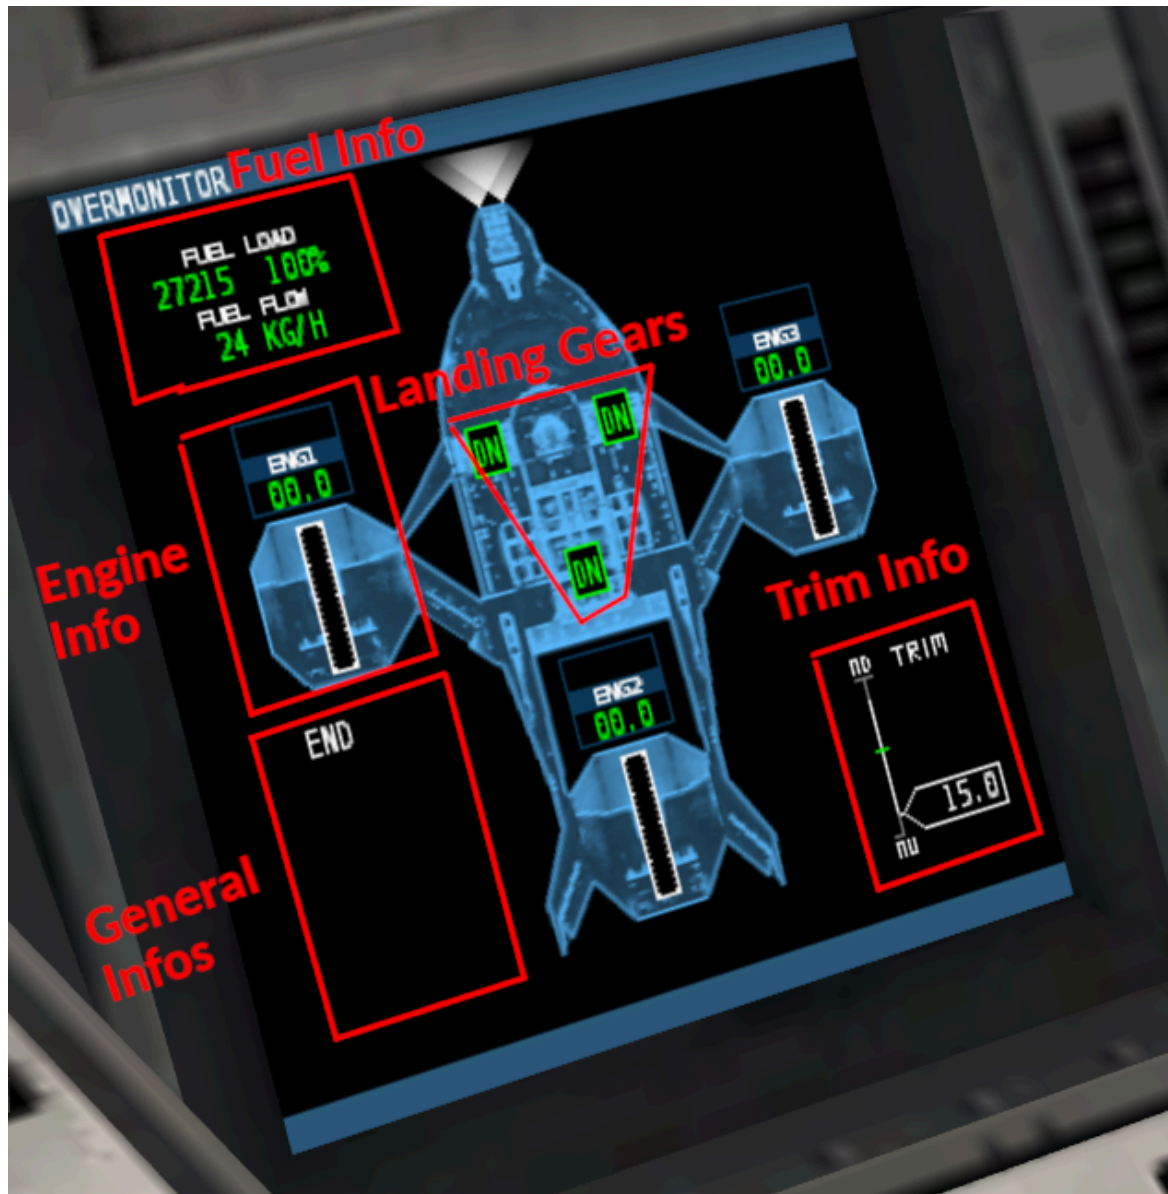

A. General view

B. Flight Instrumentals and Indicators

C. Overmonitor

D. Scanner
